**Dear Mr. Cheney:**

RE: Namahbin Roller Mills Dam, Waukesha County

The Water Regulation and Zoning staff of the Wisconsin Department of Natural Resources is actively seeking enforcement on the impoundment level violation which occurred at the Zerwick property. I have met with the area conservation warden who is going to speak to the Waukesha County District Attorney's Office. They will be discussing fines for the violation and the potential of requiring restoration. Please be informed that our Department will be requesting restoration as a condition of the level violation on the impoundment. However, the District Attorney's Office will have to decide if it is legally possible to require this amount of effort to be expended. I realize your concern over the loss of fish habitat and recreational value of the river along with potential losses in land values. Please be assured that I will take every action reasonable to resolve this issue.

Sincerely,

Matthew C. Weidensee Water Management  
Specialist  
MCW/pan
